

ARUNIMA SURENDRAN

Applied AI Engineer | Technical Marketing Specialist

📍 Bengaluru - 560047

📞 +91 9995925161

✉️ arunimasofficial@gmail.com

Applied AI Engineer working at the intersection of engineering, product, and technical marketing. I build production-grade AI systems (edge AI, LLM pipelines) while driving adoption through developer-focused content, documentation, and cross-functional collaboration. Serve as the primary interface between engineering, product marketing, documentation, and developer relations, aligning product capabilities with messaging and user needs

WORK EXPERIENCE

Developer: Technical Marketing III | Nov, 2025 - Present

Intel Corporation (External Contractor via **Harvey Nash Inc**)

- Built proof-of-concept video analytics pipelines and use-case demos for the OpenEdge Platform and OpenVINO, covering worker safety, crowd density, and anomaly detection scenarios.
- Authored developer-focused and high-level technical blogs for Edge AI Suite releases, including the Open Edge Platform 2026.0 launch.
- Contributed to and reviewed technical documentation for the OpenEdge Platform, including gap-filling PRs to improve developer onboarding.
- Conducted pre-release testing of edge AI applications, identifying and reporting bugs ahead of product launches.
- Participated in the product marketing messaging process as a subject matter resource for edge AI capabilities.

Technical Writer/ ML Engineer | June, 2025 - September, 2025

E2E Networks, Bengaluru, Karnataka

- Designed, built, and fine-tuned RAG, Instruction-tuned, Vision, and OCR models, and MCP Servers demonstrating end-to-end expertise in model development.
- Authored and published technical blogs that consistently ranked in Google's Top 3 search results and secured brand visibility in leading generative AI platforms through Generative Engine Optimization (GEO).
- Built Google Drive MCP servers using distinct methods: OAuth Client, GDrive API, Rclone mount, and Cookie-based access to enable flexible data integration.

Content Writer | May, 2024 - May, 2025

Qicpic Innovations Pvt. Ltd., Bengaluru, Karnataka

- Developed and trained text-to-text LLMs to automate optimized marketing content.
- Created website/UI/UX content and automated content generation.
- Produced SEO-friendly content for digital marketing, including blogs, video scripts, and emails.

Freelance Content Writer | Oct, 2020 - Apr, 2024

Creative Writing: Created B2B/B2C social media content, blogs, emails, and SEO-optimized website copy while developing content strategies, marketing plans, and editorial calendars.

Academic Writing: Simplified complex Physics and Mathematics concepts for students with clear explanations and solutions.

Subject Matter: Solved Physics and Mathematics problems with detailed explanations and concept clarifications.

FEATURED PUBLICATIONS

- [Real-Time Crowd Density Estimation Using CSRNet and OpenVINO](#)
- [Advancing Edge Intelligence: What's New in Open Edge Platform 2026.0](#)
- [A Developer's Guide to Edge AI Workloads with Metro AI Suite](#)
- [Building a Domain-Specific Medical Reasoning Model with Supervised Fine-Tuning on GPT-OSS-20B](#)

OPEN-SOURCE PROJECTS

- Worker Safety & Fall Detection: Multi-model edge pipeline combining keypoints + temporal logic for real-time detection
- Crowd Density Estimation (CSRNet): OpenVINO-optimized pipeline with efficient model conversion for deployment
- Driver Fatigue Detection: Multi-signal behavioral inference system using facial and eye landmarks
- Medical LLM Fine-Tuning: SFT on 90k dataset with large-scale evaluation (1.7M rows), published with full methodology
- Anomaly Detection (Autoencoder): Unsupervised defect detection pipeline with deployment optimization

SKILLS

- Cross-functional: Stakeholder Alignment, Technical Communication, Developer Enablement
- AI/ML: PyTorch, Hugging Face, LLMs, RAG, OCR, Vision Models
- Edge AI: OpenVINO, DLStreamer, Intel Geti, ONNX
- Backend & Infra: Python, FastAPI, Docker, Kubernetes
- Technical Marketing: Documentation, Product Messaging, SEO/GEO

CERTIFICATIONS & BADGES

NVIDIA Certifications

- Cloud NVIDIA Technologies Technical Curriculum (Aug 2025)
- NVIDIA DGX Cloud Curriculum (Jul 2025)
- NVIDIA Marketing Guidelines (Aug 2025)

Microsoft Certification: Design and Implement Platform Engineering (Dec 2025)

Google Cloud Skill Boost

- AI Infrastructure: Cloud TPUs
- Deep Learning Foundations: Introduction to Reliable Deep Learning
- Model Architectures: Encoder–Decoder, Attention Mechanism
- MLOps: ML Ops for Generative AI, Getting Started with MLOps

EDUCATION

Bachelor of Science - Physics

2017 - 2020

Central University of Pondicherry

CGPA: 7.67/10
